Forecast for Thursday 14 Oct 2021

Weather: Plenty of cloud around through the morning, this dipping below the summits at times and bringing a few spells of light drizzle, mainly to western slopes. Cloud may break through the middle of the day to allow some fleeting spells of sunshine. A band of rain will sink southwards towards midnight evening.

Chance of cloud free mountain/hill tops above 600m: 70%.

Visibility: Generally good with some reasonable views on offer under the cloud base, although a rather dull feel to the day. Some hill fog is probable at times, mainly early in the day and again after dark.

Meteorologist's View

Nothing to add.

Recent rainfall: measured at Cat & Fiddle: altitude 511m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Wed 13 Oct 2021	5.8mm	10.4mm	10.6mm

Forecast for Friday 15 Oct 2021

Weather: Overnight rain will clear by dawn to leave a marked change to colder conditions with little in the way of cloud cover and much lighter winds compared to Thursday. The odd mist or fog patch may develop in the valleys but will readily clear through morning. Cloud thickening through late evening.

Maximum wind: Northeast 10-20mph initially, becoming east or southeast 5-10mph by afternoon.

Chance of cloud free mountain/hill tops above 600m: 100%

Visibility: Away from any early mist or fog in the valleys, visibility will be very good with far reaching views on offer and good clarity to the air.

Temperature: **Valleys:** Plus 6 Celsius, rising to around 12 Celsius.
At 600m: Around plus 3 Celsius early and late, rising to 7 Celsius through the day.
Freezing level: Above summits.
